10. Key points of the analysis are made on the basis of certain assumptions:

- The volume database is exhaustive since, during the first control year, it was used for calculation until the end of the monitoring period (confinement).
- For the 1991-1992 (1993-1994) year cycle, when a significant portion of the population was not included in the monitoring, the results of the 1992-1993 (1994-1995) year cycle were used for calculation.
